REPLY TO ACTION OF JUNE 19, 2003

REMARKS

Claims 1-12 are pending. Claims 11 and 12 have been allowed. The applicant thanks the Examiner for the allowable subject matter.

Claim rejections – 35 USC 103

Claims 1 to 10 have been rejected as being unpatentable over Lin in view of Shimizu. It is alleged that Lin teaches everything in claims 1 and 4 except removing the oxide layer on the second device formation region along with the oxidation resistant film on the second formation region, and forming a new oxidation by thermal oxidation. However, the Examiner continues on to state that Shimizu teaches these omitted steps.

Applicant respectfully assert that that Lin, alone or in combination with Shimizu, does not teach or suggest the present invention as claimed for the following reasons.
